Anupama Hosad

UI Engineer · Bibliophile · INFJ

I am a UI Engineer having 7+ years of experience in using client side technologies like HTML, CSS, JavaScript and libraries / frameworks like jQuery, Backbone, React, Handlebars, Underscore, Require JS, Node JS, Bootstrap, Less, SCSS, Grunt and Webpack for building highly performant and scalable web applications.

In my spare time I attend meetups, explore new technologies & read a lot of fiction! Come say hi if you attend [Girls Who Javascript](#), [JS Lovers-Bengaluru](#), [Javascript Meetup](#) or [React JS Bangalore](#). Always in search of new experiences, I have recently started dabbling into [photography](#).
