Anupama Ho&ad

Frontend Engineer · Bibliophile · INFJ

I am a UI Engineer having 9+ years of experience in using client side technologies like HTML, CSS, JavaScript and libraries / frameworks like jQuery, Backbone, React, Gatsby, Grahp QL, Handlebars, Underscore, Require JS, Node JS, Bootstrap, Less, SCSS, Grunt and Webpack for building highly performant and scalable web applications.

In my spare time I attend meetups, explore new technologies & read a lot of fiction! Come say hi if you attend [Girls Who Javascript](#), [JS Lovers-Bengaluru](#), [Javascript Meetup](#) or [React JS Bangalore](#). Always in search of new experiences, I have recently started dabbling into [photography](#).
